## Discussing Options and Referring Adolescents to Treatment

### A component of **Using SBIRT to Talk to Adolescents about Substance Use** four-part webinar series

This fourth webinar in the series outlines how health professionals can connect adolescents who screen at risk for substance use to appropriate treatment. This webinar will demystify the referral to treatment process, providing sample dialogues and tips to facilitate effective linkages and follow-ups. The presenter will also review unique challenges that a health professional might encounter when referring adolescents to treatment, such as confidentiality and push back.

Along with cutting-edge, evidence-based education, the expert presenters will provide sample scripts and role plays so participants gain strategies to use right away with adolescents in many settings. This free education is ideal for anyone who wishes to gain an in-depth understanding of SBIRT and its use with adolescents, designed for both those who are new to SBIRT and for those who want more advanced training beyond an overview.

#### Learning Objectives:

- Learn how to provide referrals and facilitate linkages to treatment for adolescents who screen at risk.
- Understand the importance of follow-up and what to cover during these encounters.

- Ideal for social work and nursing students, educators, and clinical supervisors, as well as mental health counselors, substance use professionals, medical professionals, professional counselors, psychologists, employee assistance professionals, and other helping professionals that are interested in learning about SBIRT
- Use with clinical supervision or watch together with your colleagues
- Free Certificates of Attendance for everyone
- Only need a computer/internet connection or a smartphone (compatible with PC, Mac, iPad, iPhone, Android)
- Closed captioning available
