

FREE WEBINAR

Who's Doing What?: The Epidemiology of Adolescent Substance Use

Description:

This free webinar will review the epidemiology of adolescent substance. We will discuss the substances most often used by youth, look at trends in youth substance use over time, and discuss the protective role of family and positive social supports.

Presenter:

Veronika Mesheriakova
MD

Learning Objectives:

- Outline substances most commonly used by adolescents in the U.S. and describe trends in adolescent substance use over time;
- Recount the relationship between adolescent substance use and key indicators of health; and
- Relate how the family and positive social supports serve as protective factors.

- Ideal for social work and nursing students, educators, and clinical supervisors, as well as mental health counselors, substance use professionals, medical professionals, professional counselors, psychologists, employee assistance professionals, and other helping professionals that are interested in learning about SBIRT
- Use with clinical supervision or watch together with your colleagues
- Free Certificates of completion for everyone
- Only need a computer/internet connection or a smartphone (compatible with PC, Mac, iPad, iPhone, Android)

Produced in partnership with the Addiction Technology Transfer Center (ATTC) Network Coordinating Office, the Association for Multidisciplinary Education and Research in Substance Use and Addiction (AMERSA), and the Adolescent SBIRT Project by NORC at the University of Chicago.
