Screening, Brief Intervention, and Referral to Treatment (SBIRT)

is a comprehensive, integrated, public health approach to the delivery of early intervention for individuals with risky alcohol and drug use, and the timely referral to more intensive substance abuse treatment for those who have substance abuse disorders.

Integrating Suicide Prevention into the SBIRT Model

Presented by **Brett Harris, DrPH**

Thursday, January 24, 2019 @ 1-2:30pm ET (12CT/11MT/10PT)

This summer - in the wake of two celebrity suicides and the release of the CDC report highlighting an alarming rise in the US suicide rate - the public's attention was drawn to the significant public health problem of suicide. Because alcohol and drug use greatly increase suicide risk, it is critical to integrate suicide prevention into substance use early intervention and treatment. This webinar describes suicide as a public health problem and explains how suicide screening and intervention can be integrated into the SBIRT model.
