

INCREASE YOUR IMPACT

Learn how Screening, Brief Intervention, and Referral to Treatment (SBIRT) for alcohol and drug use can improve patient care.

Register today for a FREE online course at sbirt.care

About the Course

SBIRT for Health and Behavioral Health Professionals: How to Talk to Patients about Substance Use is a 4-hour, self-paced, online course. Learners will take part in an interactive orientation on SBIRT (screening, brief intervention, and referral to treatment for substance use), applying their learning through interactive games, case scenarios, and quizzes to develop their knowledge, skills, and abilities in using SBIRT as an intervention with patients.

Continuing Education

This course offers 4 contact hours of FREE continuing education for nursing, social work, and counseling professionals (CNE, NASW, CHES, NAADAC, and NBCC).

The University of Missouri-Kansas City School of Nursing & Health Studies is a designated provider of continuing education contact hours in health education by the National Commission for Health Education Credentialing, Inc.

The University of Missouri-Kansas City School of Nursing & Health Studies is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

This program is approved by the National Association of Social Workers (Approval #886475666-3147) for 4 continuing education contact hours.

This course was developed by the University of Missouri-Kansas City (UMKC) SBIRT Project located at the UMKC School of Nursing and Health Studies, with funding by grant TI025355 from the Department of Health and Human Services, Substance Abuse and Mental Health Services Administration (SAMHSA).

Why Learn SBIRT?

- Standardized alcohol and drug screening helps you identify patients at risk for health and mental health problems.
- A 5- to 15-minute brief intervention helps patients reduce their alcohol use and related consequences.
- A brief intervention with a warm handoff helps you motivate patients to accept a referral to addiction treatment if needed.

Companion Video Series: SBIRT for Health and Behavioral Health Professionals: How to Talk to Patients about Substance Use

The SBIRT for Health and Behavioral Health Professionals online course features a 4-part video series that demonstrates health and behavioral health professionals using SBIRT with clients. The videos feature brief interventions for patients in the Risky, Harmful, and Severe (Referral to Treatment) Zones and a clinician case study about the importance of universal screening for alcohol and drug use. The videos are embedded throughout the course, but can also be accessed for free on Vimeo: <https://vimeo.com/album/3507664>
